I complete nightmare finding computers and internet in the middle of know where north eastern Europe. Please excuse any typos as spell check is in russian. I've listed some questions below. I looked at the sample questions that you had sent me to get som idea but do not know if I can ask questions in questions or refer to ealier questions. I have cut out some questions to be specific and narrow the coverage of what I am asking.

Thank you very much indeed for all this, it I will be very interested in the responses. What is the time scale for a response?

1, What is the current cost to her majesties' government of orthodontic therapy, including associated extractions and surgery?

2, What factors does her majesties' government suspect are the causes of the problems treated by orthodontic therapy for a normal healthy child requiring treatment, what evidence is this based on and what is the pathological process by which these factors are thought to effect a child?

3, What is the process by which her majesties government feel that current orthodontic treatment aims to treat the suspected causes, as outline in question 2?

4, If only the correction of the upper visible teeth were funded, A) how much would be saved B) what health benefit would be forgone.

Best wishes from Latvia, (absolutely poured with rain as we arrived, and had been great here, so if the UK is now having good weather it must be me.....

Mike

To ask Her Majesty's Government, under the provisions of the Health and Social Care Act 2012, how the training tariff for medical and dental postgraduate training will be calculated, particularly in relation to the training levy.

To ask Her Majesty's Government what assessment they have made of what impact the proposal of the Office of Rail Regulation to increase charges for carrying iron ore by rail will have on the future prospects of the steel industry in Scunthorpe.

In Latvia, could you send me a couple of example questions and I will have our questions back with you tomorrow.

Thanks,

Mike
